DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by the patent to Soubaras ('203).

The patent to Soubaras discloses a method and apparatus for processing seismic data. The method includes actuating a seismic source, acquiring seismic data in the frequency-space domain, determining a prediction filter from seismic data at a frequency at which swell noise is not present (see col. 4, lines 9-10) and applying the prediction filter to seismic data at a frequency where swell noise is present to thereby attenuate the swell noise. The apparatus includes means for acquiring seismic data in the frequency-space domain, means for determining a prediction filter from the seismic data at a frequency where swell noise is not present (col. 4, lines 9-10) and means for applying the prediction filter to seismic data at a frequency where swell noise is present to thereby attenuate the swell noise. Independent claims 1, 6, 9, 14 and 16 are thus, anticipated.

Dependent claims 2-5, 7, 8, 10-13 and 15 are further anticipated by the method and apparatus disclosed in Soubaras.

Claim Objections

3. Claims 14 and 15 are objected to because of the following informalities:

Claim 14, line 4, and line 6 claim a “third frequency” and a “fourth frequency”, respectively. However, the antecedents for a first and second frequency are not clearly set forth. Appropriate correction is required.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
